Similarity Search b
Estimated time needed: 30 minutes
In this lab, you will learn how to manually
machine learning and information retriev
comparing data points—often represent
Embedding vectors encode information s
of the input (e.g., a piece of text), while t
encoded features. In this lab, you will cal
similarity, gaining a deeper understandin
behind the scenes.
Table of Contents
1. Similarity Search by Hand
A. Objectives
B. Setup
a. Install Required Libraries
b. Restart the Kernel
c. Import Required Libraries
C. Obtain Vector Embeddings
D. L2 (Euclidean) Distance
a. Manual implementation of
i. Exercise 1 - Make the m
b. Calculate L2 distance using
c. Interpret the L2 Distance R
E. Dot Product Similarity and Dista
a. Manual implementation of
b. Calculate the dot product u
c. Calculate dot product dista
F. Cosine Similarity and Distance
a. Manual implementation of
i. Calculate the L2 norm
ii. Normalize embedding
